

Pre-IGORR

“Many organizations, in several countries, are planning or implementing new or upgraded research reactor projects, but there has been no organized forum devoted entirely to discussion and exchange of information in this field”

(Preface to Proceedings of the first meeting)

End of First IGORR Meeting – A Charter

“The International Group on Research Reactors was formed to facilitate the sharing of knowledge and experiences among those institutions and individuals who are actively working to design, build and promote new research reactors or to make significant upgrades to existing facilities”

(Proceedings of the first meeting)

End of First IGORR Meeting – Some Choices

- ...”IGORR will continue to seek interaction with other organizations representing research reactor operators and users, including university reactors, the IAEA, and the European research reactor community”
- Meetings would be held about every 18 months (it immediately became an old tradition to rotate the meetings through American, European and Pacific locations)
